PROFILE

A highly motivated and enthusiastic third-year B.Tech Computer Science and Engineering student with strong foundational knowledge in programming, data structures, and software development. Skilled in Python, C++, and Java with hands-on experience in web development and database management. Passionate about solving real-world problems through technology and actively involved in academic projects, coding competitions, and technical workshops. Eager to apply theoretical knowledge to practical challenges through internships and industry collaborations. Strong communication, teamwork, and analytical skills, with a keen interest in emerging technologies such as AI, machine learning, and cloud computing.

WORK EXPERIENCE

Virtual Internships

Self-Driven Python Automation (Remote)

- Created Python scripts to automate file renaming, folder organization, and report generation.
- Used libraries like `os`, `pandas`, and `openpyxl` to process Excel data.

Online Training as Experience

Anudip Foundation (Online)

- Learned file handling, OOP, web scraping, and automation using libraries like os, pandas, openpyxl.

Personal

COVID-19 Data Dashboard | Excel & Python

- Built an interactive dashboard analyzing COVID trends using real-time data.
- Used pandas and matplotlib for data handling and visualization.
